PROFESSIONAL SUMMARY

Full Stack Developer with nearly 2 years of experience building web applications that are easy to use, fast, and secure. I enjoy building complete web solutions, from the visual layout that users see to the data storage behind the scenes. I focus on writing clear, simple code that is easy to maintain and improve. Currently finishing a BS in IT, where I am balancing my studies with a focus on system security and building reliable back-end systems.

WORK EXPERIENCE

Full Stack Developer | **Globbic Ltd (UK)** *March 2025 – Present*

- Built tools for travel booking that update in real-time, helping users see accurate flight details instantly.
- Designed website interfaces that load quickly and are easy for users to navigate.
- Improved the speed of our applications by simplifying the background code and organizing how our database handles information.

Team Leading & Full Stack Engineer | **Zee Concepts** *Feb 2024 – March 2025*

- Guided the development of various projects, making sure we hit our deadlines without compromising on quality.
- Managed the server and database setup, kept systems secure, and helped team members improve their work through regular code reviews.

EDUCATION & CERTIFICATIONS

BS Information Technology | **The Superior University, Lahore** *2023 – 2027*

- Final Year - 8th Semester | Coursework: DSA, DBMS, Computer Networking, Software Engineering
- Focus: Full-Stack Development (MERN & Next.js), AI Integrations, System Security, Backend Development

Professional Certified Full Stack Development (1 Year) | **PNY Arfa Tower, Lahore**

- Intensive training in MERN stack, database design, and building scalable full-stack web applications.
- Practical experience in modern frontend frameworks, API development, and deployment workflows.

Certified Ethical Hacking v13 | **PNY Arfa Tower, Lahore**

- Advanced training in network security, penetration testing, and identification of system vulnerabilities.
- Hands-on experience with industry-standard security tools, ethical hacking frameworks, and defensive strategies.

KEY PROJECTS

- Delivered over 30 web projects since 2023. I handle the entire process from the first idea and design to setting up the final site.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, MERN Stack (React, MongoDB, Express.js, Node.js), HTML5, CSS3.

Tools & Methodologies: Git/GitHub, Postman, Vercel/Netlify Deployment, Clean Code, OOP, Data Structures (DSA).

ADDITIONAL

YouTube Educator — @eazypizycoders Teaching MERN stack & web development to a growing developer community

Languages — English (Professional Proficiency), Urdu (Native)

Availability — Open to full-time, part-time, and remote opportunities (Lahore, Pakistan & International)
